

The system

The delivery contains following parts:

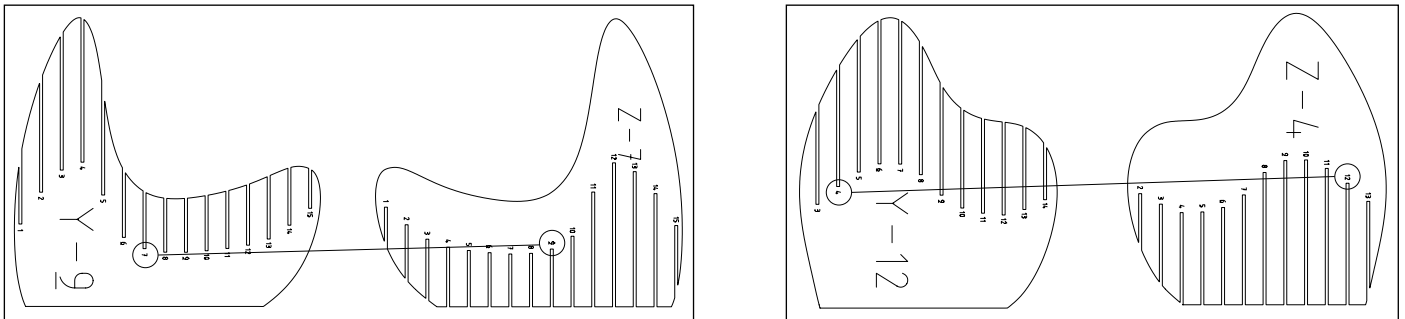

- Y-parts: Slots open to the upside (15 parts)
- Z-parts: Slots open to the downside (15 parts)

All parts only need to be plugged.

Each Y-Part has a name, e.g. Y-2 or Y-9. Each slot has a number (1 - 15). In each slot a Y-part fits only a certain Z-part. The number of a slot indicates the name of the corresponding part.

An example:

- Slot 7 of part Y-9 is corresponding with part Z-7 with the slot number 9.
- Slot 4 of part Y-12 is corresponding with part Z-4 with the slot number 12.

Take care, that the labeling of the parts always faces the same direction. It is not notable in which direction, as long as it is always the same.

Procedure:

Start to arrange 4 Y-party in the correct order. We recommend the middle parts (Y-6 to Y-9). Now, put in 2 Z-parts, to stabilize the Y-parts.

Keep going with further Y-parts.

Annotation:

Coming to an end, it will be easier to put in Z-parts, since that can happen from the upside. The more Y-parts are installed at the beginning, the easier it will be at the end continuing with the Z-parts.

After the installation, we recommend to align all parts correctly and to glue them. Just press some glue in the waves of the cardboard. Wood glue will become invisible when dry.
